## Abstract

In this paper will be treated the concept of budgeting participation in local governance; What is participatory budgeting, which gave birth for the first time as a concept? Participatory budgeting is a new concept and useful. In some local strategic document she is referred to, and including, but again its recognition remains at low levels. Consequently his approach in practice is almost invisible. This is the main reason for the treatment of this topic. A work which will present clearly the meaning and importance of participatory budgeting.

**Key words:** *budgeting strategic document, local government, new concept participation,*
