Abstrakt

Domestic crime is one of the social problems in our country. Statistical data for the City of Durres talk to counting crimes increased violence, and also show that the family is getting a "dangerous place" of crime. The study of crime will bemade from the perspective of theoretical paradigms. The factors such as economic, cultural, emotional, social, are sources that generate violence or crime within the family.The analysis focuses on the role of the state and other agencies of socialization to create economic stability, but also to create conditions for "mental health" of citizens.The social problems of contemporary society have their roots in the past, the present and the consequences in the future.The focus of the study are mainly factors, however, including the conditions that surround deeply social.The switching from a totalitarian to a democratic society brought not only functional changes,but opened the way for the emancipation of the Albanian society, but they understood not the same for all individuals. This was followed by the report of the crisis misunderstandings and individual human rights. This misunderstanding often associated with deviant behavior or to the criminal."Communication Matrix" is very important in the socialization of members in the family.For the realization of this study have selected quantitative and qualitative methods, such as: free interviews, structured.The data of the study are based on several search methods:• Official data from the District Police Department of Durres.• Review of the print media.• Survey 350

 Key words: *"Communication Matrix" social cohesion, crime, socialization agency, integration, "mental health".*
