Abstract

Title: Possibility that gives the drawing of children in recognizing their maturity and development. Drawing of children constitutes a very valuable object for teachers and educators. This article takes into consideration drawings of about 200 children aged 3 to 6 years in Shkodra and just drawing "test man" to point out the contact between drawing evolution and maturity of the child. This article demonstrates a clear correspondence between the number of details the development and maturity of children in different age groups, 3 to 4, 4 to 5 and 5 to 6 years. The article contrasts in detail the scientific literature with the conclusions reached during the study and states clearly the need for equipment with basic knowledge in the field of teachers, educators and all others who deal with children in a professional manner.

Materials and methods: This research was done in kindergartens of Shkodra giving children draw a man without interfering more and being as neutral in the answers of the children. Analysis of the data, statistics, and tables were made in Microsoft Excel and bibliography was obtained from the scientific literature contemporary correspondent.

Keywords: *children's drawings, human figure drawing test*
