Abstract

In the article will be treated student achievement in Albanian schools mainly on the basis of settlement. In an age where education is a major concern of every state, processing the necessary educational and reliable indicators, it becomes essential in the formulation and monitoring of policies in this field. Our schools today are making great efforts to orient the teaching and learning process to students, so pass from traditional teaching to that contemporary, which prepares students with the knowledge, skills and values necessary for life. If we look at education development analyzers and its components in the north and northeast of the country, notes a number of problems associated with: the achievements of pupils at the end of secondary education, the achievements of teachers as well as creating opportunities for orientation further towards professions in these areas. It is important to highlight the achievements of students on the basis of settlements. Does Albanian school offers students an equal opportunity wherever they live? exactly these and other related to the assessment of student achievement will be treated in the article.

Keywords: *education, student achievement, State Matura in Albania.*
