Abstract

The issue of purification and enrichment of the Albanian language is one of the most essential. The flow of the foreign words and their inappropriate use, are taking the breath of Albanian language and are not leaving to flourish in their homeland. The purpose of this study is to show the ugly situation in which the Albanian language nowadays is by the use of foreign words, instead of the Albanian words. This study relies on a survey method and collection of materials from living sources. Through the treatment of the subject is aimed awareness somehow the malevolent Albanian language and not to destroy the Albanian. I concluded that if there is not a profound cleaning job of the Albanian language from unnecessary foreign words, we will not have a further enrichment, but an oblivion of the Albanian speech.

Keywords: cleaning, enrichment, awareness, foreign words, Albanian words.
