### **Abstract**

Purpose of study- The citizens of Gjakova city in Kosovo are known for their adequate expression through metaphor, chasing or "soften" aggravating names or words complimentary accounts of them doing euphemistic labels. As linguistic phenomenon known euphemisms are closely related to the tradition and culture of a country, a city or village. There are differences between the euphemistic words (from the old to the new one), from different points of human life, different professions, different education, age, sex, social class etc. All of these will be listed in alphabetical order. Methods- The methods we have used in the treatment of our case have been supported on the work and the survey, observation and interpretation. We tried to bring a clearer picture of speaking variation reports, in our case of Albanian speaking language, always when we deal with the extension of standard language in Gjakova town. The method of research and interpretation is the most predominant method in this survey, while an important place in the treatment of this topic is given to methods of surveying / questionnaire about the extent of the standard language in Gjakova town. We have done a comparison of standard Albanian language examination and other languages situations as well, which have a longer tradition of standard language, furthermore countries that have similar development situations with the Albanian standard language. Treatment of this issue is of particular significance at a time when scientific and other related debates to standard languages, place and its acceptability in the Albanian-speaking aerial are being developed. Continuously, this importance grows up with the examination and treatment of the discourse of this area, and much dialectological data are missing compared with other dialects of the Kosovo areas .This review may create a clearer idea regarding the fundamental differences of standard Albanian language extension with spoken Albanian language in Gjakova, specifically in the case of Albanian language, and based on our judgment it could give any other valuable orientation for additional development of standard language and building relation between Albanian standard language with other Albanian variation dialects.

**Keywords:** *euphemism pejorative, Gjakova city, dialects, Albanian standard language.*
