### **Abstract**

This is an article that follows my previous articles in this field to enrich and advance conclusions. This article Takes Into Consideration drawings of about 300 children Aged 3 to 7 years in Albania and just drawing "test man" to point out the contact Between Evolution and Maturity drawing of the child . This article give a clear demonstration Correspondence Between the number of details the development and Maturity of children in different age groups, 3to 4 , 5 to 6 and 6 to 7 years .This article explores in much detail all the components in the drawings derived from children . Verifies the idea that girls are more developed than boys in this period . Verifies the fact that the details are added progressively with increasing age.The article contrasts the Scientific literature in detail with the conclusions reached up during the study and the need for states Clearly Equipment with basic Knowledge in the field of teachers , educators and all others who ' deal with children in a professional MANNERT.Was this research done in kindergartens of Shkodra GIVING children draw a man without interfering more and Being neither neutral in the answers of the children . I 've used white paper and colored pencils .Analysis of the data , statistics , and tables Were Made in Microsoft Excel and bibliography Was obtained from the Scientific Literature Contemporary correspondent .
