Abstract

In its toponomy's Gjakova has a range of features in which distinguished Albanian toponyms very clean , but many of them bear upon himself to trace multiple periods of our historical past from ancient times , the early Middle Ages , late and it 's a new time , the impact of oriental languages as a result of the rule of the Turkish Empire , and finally to the Slavic influence , although in this area of Kosovo has never been more than two percent of the population belonging to the Slavic . As the empire ruling states have left their stratification in toponymy , the linguistic origin of the names of different habitats in the vicinity Gjakova , belonging to several languages. Tion in this paper I will focus on the use of permanent topographical Oriental influence in Djakovica area , so the impact of oriental languages: Turkish - Persian - Arab in Gjakova toponomy surroundings. Toponymy of Gjakova separated by type of naming the other city Kosovo which have been put into use other suffixes , as i saw while Osek documented forms is Pashaoski , Osek Hile - Hileosik forms is documented. A wide stretch of oriental origin labels observed in areas within the city that even today remain as a way of identifying more used to local residents. They jealously guard these old names , even though every neighborhood street has officially received a name given in recent history and probably is renamed during the last decade. Such cases mentioned in dozens of different categories such as springs , Mahala, bridges , bazaars etc. This shows the tendency of people to maintain traditional forms of so-called denominations, especially those derived from Turkish, Arabic and Persian. Since land holdings were formerly in the possession of the Beys of aghas had their titles and microtoponymy makrotoponymy encounter within the territory of Gjakova , as well as those devised in the headlines thanks to clerical religious authorities . Interestingly us mikrotops words emanate from the Turkish ranks as kavaz, Subash, but saray etc.

Keywords: *toponyms, macro and microtope, oriental influence, adaptation*
