

## **SMALL AND MEDIUM ENTERPRISES (SME - S) "MOTOR FORCE" IN THE ECONOMIC DEVELOPMENT OF STATES**

**Ali Ismet Cocja**

### **Abstract**

All countries of the world thanks God have comparative advantages, but each in one way or another face: High levels of unemployment, Lack of law enforcement, The degree of corruption, Inadequate resources and energy, Lack of funds. Each state has targeted economic development which is shown through statistical indicators, which show the economic situation - his social position in the World Economy. World Bank annually publishes report reflecting the position of countries in the World Economy. Economic development must precede Central Government Strategic Plan QQSh State, to support SMBs. This development is shown through economic growth rate which is obtained by comparing the GDP - in / GDP for the period prior and subsequent to that expressed in percentage. The Economic development are determined from this criteria: Combating Corruption, SME support, Export growth, Importing technology, Perfecting communication system, GDP growth and Increase social welfare through employment.

**Keywords:** *comparative advantages, unemployment, economic development, Combating Corruption*
