Abstract

As we see by the title of this study, we will deal with the situation and developments in Albania and the Albanian language in the compact Balkan territories, but also of the Albanians and Albanian language in foreign territory. What we will try to bring to our research, is associated with an early and uninterrupted phenomena: immigration of Albanians in foreign territory. Is this an ethnic move of the language, which started back in the darkened centuries with stratiotët: Arbër fighters paid, they went "*dietro la sciabolla*" in neighboring Italy and elsewhere in Europe, but will proceed forward for centuries with large migration of arbër to Greece, where they would become "arvanitas", then to Italy, where many of them were fades, but also a great amount remained in southern Italy and in Sicily as "arberesh". So even other exile sometimes massive sometimes smaller, as arber in Zadar Dalmatia, "Arnauts" in Mandricë and elsewhere in some areas in Bulgaria up to Velikotërnovo, "Arnauts" or albanians of Ukraine and so much arnauts in Turkey and elsewhere, as in Misir, Constanta etc. to the mass exodus of albanians in the 90s of the twentieth century, which will be added as a new part of the early diaspora of arbëresh in all Europe, but also in America, Canada, Australia etc.
