### Abstract

Development, instrumental in innovating and transforming the upbringing and educational system in contemporary conditions of living more based on the developmental characteristics of social phenomena-democratic, economic, scientific, technical and technological as well as changes in which the educational system more takes calls and relationships equal that accelerates the overall development of education and education. Today in modern processes democratic-pluralistic initiated needs, education system conditioned by education, science, technique, culture, democracy and the processes of civilization that accelerate social development and industry in which the individual, and education of personality to their capabilities creative will appear in the role and function of permanent and progressive venerators reality with its activity in terms of new generic modern living. Permanent education enables a person not to accept the future as something given but given the possibility to form their own future needs and needs. Also important is it that the education received in this way is not seen as education which represents preparation for life but he is human life itself. All changes and reforms in education, in particular affecting the teacher, who has been, is, and will be the bearer of process in education contemporary factors of which depends on the successful implementation of learning and increased use of modern teaching aids and audio-visual. Facing the fact that the teacher is one of the most important factors which realized contemporary educational process necessary is it to be built educationally, professionally and successfully able to perform the function. On the other hand the teacher works submitted requests for perfection of its permanent professional and pedagogical purpose can successfully respond to the demands and needs of the time in which he lives and works. Given the fact that his teacher at school cannot acquire all the knowledge, methods inalienable models need solutions from professional perfection and pedagogical staff working around the clock. The nature of teaching is such announcement requiring permanent teacher teaches, you follow the achievements in the profession itself and systematically perfected it.
