Abstract

Kosova is a post conflict, transition and new country. In this case they are a lot of opportunities but also a lot of challenges during the designing different systems needed. This paper present the challenges, experiences, results during the design and implementation of the Higher Education System in Kosovo but also the finding facts and potentials for further developments. The main focus will be on public policy analysis, curriculum development, quality assurance, research and internationalization of Higher Education in Kosovo. The methodology is based on quantitative methods and case studies following for more than 10 years.

Keywords: *Higher Education System, Public policy Analysis, System Design and Management, Quality, Research, Internationalization.*
