Abstract

ECT(A)S system since it's introduction has passed through various changes and improvement. Issue of determination of ECT(A)S workload by students and by professors was looking for a long time. As a process of QA structure within the University system of QA process, University of Zenica has implemented system of measurement of ECT(A)S workload from students part. This paper has described process of development of system for purpose of measurement of ECT(A)S workload, and it's implementation within the University QA system and QA structure. It has been found that this type of questionnaires are very useful in curricula innovation and QA structure elements implementation. This paper represents data as outcomes from 10 year experience in measurement of workload within the QA structure.

Keywords: *ECT(A)S credits, University, students, workload.*
