

DIGITALIZATION AND EXCELLENCE MODEL IN HIGHER EDUCATION INSTITUTIONS SYSTEM. UBT AS CASE STUDY

Edmond Hajrizi

President of UBT, Kosovo, Email: eharizi@ubt-uni.net

Abstract

The University of the Future. The rapid development of the technology is influencing also the model of the Higher Education Institution overall. In the same time we are looking more and more for entrepreneurial spirit in HEI too. This required better competences in leadership, management, social responsibility and innovation. For the HEI in transition countries this can be an opportunity because most of the Institution are new. Using ICT does not correlate with the economic growth of the country and can be easily implemented. This paper shows the programs and models for Digitalization, Virtualization and the Excellence at UBT – Higher Education Institution in Kosovo and their impact on quality in education, research and services. It proves the Proposition that because of the green filed concept for system design and implementation the HEI can use the advantages to become the leadership role on the implementation of new concepts and trends using the best practice and newest technology.
